

Muhammed Gamal Maklad

Data Analytics Engineer

📍 Cairo, Egypt ✉ mo7amedmaklad@gmail.com ☎ 01117717161
🛂 Military Status: Exempted [in linkedin](#) [Github](#) [Protofolio](#)

Summary

Data and Business Intelligence Engineer with a strong background in **data analytics**, **business intelligence**, and **machine learning**. Experienced in building **Power BI dashboards**, **ETL pipelines**, and **automated business workflows** using the Microsoft Power Platform. Skilled in transforming complex datasets into actionable insights that support data-driven decision making. Hands-on experience with **Python**, **SQL**, **Microsoft Azure**, and **cloud-based AI solutions**.

Education

Bachelor's Degree in Computer Science 2025
Mansoura University *GPA: 3.45 / 4.0*

- **Relevant Coursework:** Artificial Intelligence, Neural Networks, Natural Language Processing, Probability & Statistics, Linear Algebra, Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Robotics.

Experience

Data & BI Solutions Trainee Jan 2026 – May 2026
Information Technology Institute (ITI), Mansoura

- Developed interactive **Power BI** dashboards and **KPI reports** to support business performance analysis and decision-making.
- Built end-to-end **ETL pipelines** using **SSIS** and **Power Query**, designed **Data Warehouse (DWH)** solutions, and developed multidimensional models with **SSAS**.
- Created analytical and operational reports using **SSRS**, developed advanced **DAX** calculations, and applied **testing** practices to ensure data quality and reporting accuracy.
- Automated business workflows using **Power Automate** and **Power Apps**, while leveraging **Docker** for deployment and environment consistency.

Machine Learning Engineer Trainee Jun 2024 – Dec 2024
Digital Egypt Pioneers Initiative (DEPI), Cairo

- Developed and evaluated **Machine Learning models** using supervised and unsupervised learning techniques.
- Performed **data preprocessing**, **feature engineering**, and model optimization using **Python**, **Pandas**, and **NumPy**.
- Built AI solutions with **TensorFlow**, **PyTorch**, and **Microsoft Azure** for **NLP** and **Computer Vision** applications while working in **Agile** environments.

Key Projects

Customer Intelligence Analytics Platform May 2026
[GitHub](#)

- Built an enterprise customer analytics platform integrating customer, billing, and call-center data into a centralized SQL Server Data Warehouse.
- Developed 30+ BI dashboards using Power BI, Tableau, and Excel, enabling churn analysis, CLTV segmentation, revenue tracking, and customer behavior insights.
- Designed ETL pipelines and star-schema models while applying predictive analytics to support customer retention and business decision-making.

Urban Land Use Analytics Dashboard - Freelance Jul 2026

- Developed an interactive Power BI dashboard to analyze land-use distribution, urban growth, and area utilization using executive-level KPIs and dynamic visualizations.
- Built a star-schema data model, transformed data with Power Query, and implemented advanced DAX measures for interactive reporting and analysis.

Restaurant Analytics Dashboard

Apr 2026

[GitHub](#)

- Developed a 5-dashboard Power BI solution delivering executive, sales, operations, customer, and financial insights.
- Integrated Databricks data sources, created advanced DAX measures, and implemented Row-Level Security (RLS) for role-based access.

Sales Analytics Dashboard

Apr 2026

[Tableau Public](#) – [GitHub](#)

- Built 5 interactive Tableau dashboards covering sales, profit, customer, and product performance analytics.
- Applied Top-N analysis, contribution metrics, and dynamic filtering to uncover profitability gaps and actionable business insights.

Roshtty – Medical Prescription OCR System

Sep 2024 – Jul 2025

[Live Demo](#) ([Azure-Hosted](#))

- Developed and deployed an AI-powered OCR system for handwritten medical prescriptions using Flask, image preprocessing techniques, and annotation.
- Hosted the solution on Microsoft Azure with structured JSON outputs and confidence scoring to improve extraction reliability.

Linguasense – Multilingual Sentiment Analysis Chatbot

Oct 2024

[GitHub Repository](#)

- Built a multilingual NLP chatbot using Whisper ASR, DistilBERT, Llama 3.1, and Streamlit for real-time sentiment analysis.
- Implemented Retrieval-Augmented Generation (RAG) with FAISS to enable scalable review analysis and intelligent responses.

Technical Skills

- **Data Analytics & BI:** Power BI, Tableau, Excel, SQL, SSIS, SSAS, DAX, Power Query, Data Visualization, Data Modeling, KPI Reporting
- **Programming:** Python, SQL, C#, MongoDB (NoSQL)
- **Machine Learning & AI:** Scikit-learn, TensorFlow, PyTorch, Computer Vision, Natural Language Processing
- **Cloud & DevOps:** Microsoft Azure, Docker, Git, GitHub
- **Application Development:** Flask, Streamlit, REST APIs, PowerApps, Power Automate (Workflow Automation)
- **Core Competencies:** Problem Solving, Analytical Thinking, Agile Collaboration, Communication

Languages

- **Arabic** : Native
- **English** : Professional Working Proficiency
